

**YOUR SINK CENTRE, THE HEART OF EVERY KITCHEN.**

- The sink is the most important workplace in the kitchen.

Kitchens are as individual as the people using them. The sink in particular – as the work area most used – should be adapted to comply with the various requirements and needs of individual users.

Blanco has many ranges of kitchen sinks, taps, and accessories standards when it comes to versatility. Made of high-quality stainless steel, it is appealing thanks to a strong functional design thus facilitating optimum adaptation to individual kitchens and the respective requirements pertaining to use

If you are looking for quality, you should not accept any compromises.

For many years, BLANCO has repeatedly been setting standards as a system provider of Kitchen Technology, something proven time and time again through their innovation in the area of under-mount bowls. Unique design meets top quality and functionality.

The bowls are installed under the worktop without any steps or edges. This flowing transition creates considerably more space for the individual work stages.

“The bitterness of poor quality remains long after the sweetness of low price is forgotten”

The wide diversity of different bowl shapes and sizes provide a countless variety of options with worktops in real wood or natural stone, which impart a particular elegance to kitchen.

Perfectly matching accessories and the combination of main, additional bowl and recessed drainer create functional workplaces. In combination with tap and waste separation system it is thus possible to design a complete function sink centre with under-mount bowls as well, which makes all the difference as far as innovation and function are concerned.

## SILGRANIT

- Form and function in perfect harmony

SILGRANIT from BLANCO is the original. The hardest elements found in natural granite comprise approx. 80% of the material, giving the sink centre an unsurpassed hardness and scratch resistance. High quality acrylic bonds the material for the whole life of the kitchen, giving the sink centre a non-porous, sealed surface and making it particularly easy to care for.

You can also enjoy its many advantages which make your daily kitchen work considerable more pleasant:

- ❖ Wide range of pearl and plain colors, from brilliant white to the exclusive alu metallic.
- ❖ Pleasantly warm, natural appearance,
- ❖ Unsurpassed scratch resistance as hard as stone
- ❖ Heat resistant up to 280°C
- ❖ Stain and acid resistant
- ❖ Non fading – even in direct sunlight
- ❖ Easy to care for as a result of its sealed surface
